# Priscila Rodrigues da Silva

Senior Fullstack Developer (Java | Node | React | React Native | Vue)

Brussels Metropolitan Area

## Experience

ATS4IT

4 years 10 months

Senior Full-Stack Consultant

May 2023 - June 2026 (3 years 2 months)

Brussels

SPF Stratégie et Appui BOSA - May 2023 – June 2026.

Java 17+ with Spring Boot 3, Camunda 8, Jasper Report, Node.js 20+, Vue 2/3, Nuxt 2/3/4, Vuetify 2, CSS, Figma, Bitbucket and OpenShift.

Subproject: OOTS (Once Only Technical System) – EU SDG

- Platform enabling secure cross-border exchange of official evidence between EU member states for fully online administrative procedures.
- Developed the Evidence Picker application, a dynamic wizard-based frontend allowing users to locate and select evidences through backend-driven UI rendering.
- Implemented and maintained reusable dynamic components rendered conditionally based on backend payloads.
- Migrated Nuxt and Vue to recent versions, responsive design layout, accessibility compliance (WCAG), and Snyk vulnerability fixes.
- Developed backend services with Spring Boot responsible for creating components that are rendered by the frontend.

Subproject: Federated Marketplace: The Federated API Marketplace is a central hub which makes it easy for partners on all levels of government to connect to the public administration's APIs.

- Developed frontend features and user interface components.
- Implemented file upload functionalities and markdown rendering with Mermaid diagram support.

Subproject: IAF (Intelligent Application Framework)

- Maintained and developed multiple public-sector applications and forms for BOSA.

- Contributed to projects such as Jobpol, FANC, RSVZ-CVB, Police Aquatask, Liège Weapon, SNOW (ServiceNow) integration modules and Jasper template management tool.

#### Senior Frontend Consultant

February 2023 - May 2023 (4 months)

Brussels

SPF Stratégie et Appui BOSA

React, NextJS and MongoDB.

- Contributed to the development of an internal project management platform inspired by Trello, supporting dashboards, cards, comments, replies, user invitations, and task assignments among other features.
- Implemented responsive design improvements for mobile devices.
- Added multilingual support and translated the application into French and Dutch.
- Developed user deletion and project membership management features across frontend and backend layers.
- Performed manual testing, bug fixing, and UI improvements based on business priorities.
- Improved user experience through interface optimizations, including dynamic and sticky navigation components.

#### Senior Full-Stack Consultant

July 2022 - January 2023 (7 months)

Luxembourg, Luxembourg

PwC Luxembourg

Java 8 with Spring Boot, React 16 with PrimeReact, Node.js, NestJS, SQL Server, Azure DevOps.

- Contributed to the replacement of a 15-year-old monolithic Java/JSP application into a React and Spring Boot architecture.
- Analyzed and mapped legacy JSP pages, business actions, and workflows to design and implement the new application structure.
- Created a Node.js/NestJS mock API layer to simulate backend REST services, enabling frontend development to progress independently from backend dependencies.
- Developed and modernized frontend features using React and PrimeReact, improving usability while preserving familiar workflows for existing users.

- Customized PrimeReact themes and components to comply with PwC design guidelines and align with other internal platforms.
- Developed REST endpoints and backend services using Java 8 and Spring Boot after modernization of the legacy EJB/WebSphere architecture.

#### Senior Full-Stack Consultant

September 2021 - June 2022 (10 months)

Brussels Metropolitan Area

Eurocontrol - European Organisation for the Safety of Air Navigation

Java 8 with Spring Boot, Angular 13 with primeNG, Oracle DB and Jenkins.

- Contributed to the development of a new application intended to replace a legacy IPv6 management platform used across European states and organizations.
- Developed backend and frontend features for managing IPv6 address space allocations, organizational focal points, and annual validation workflows.
- Implemented role-based access functionalities for administrators, editors, and readers across multiple organizations and states.

#### KCS iT

2 years 5 months

#### Senior Full-Stack Consultant

June 2020 - September 2021 (1 year 4 months)

Brussels Metropolitan Area

Alpha Credit – Financial Services

Java 8, Spring Boot, HTML, CSS, JavaScript, SOAP, REST APIs.

- Contributed to the development of three enterprise applications using Java 8 and Spring Boot.
- Developed new Expense Sheet application to replace a legacy Expense Sheet system, in which employees could input their expenses to be reimbursed later.
- Built REST APIs integrating internal Alpha Credit systems with Evidos for electronic contract signature.
- Developed a vehicle lease simulation API in which the goal was the customer to be able to simulate credit when a s/he asks for a vehicle lease and provide a calculation for his/her lease as a response.

#### Senior Full-Stack Consultant

March 2020 - June 2020 (4 months)

Brussels

European Parliament (experience shortened by covid-19, recommendation letter available)

Java 8 with Spring MVC, Oracle DB and Angular 7, GitHub.

- Maintenance and new features for the backend and frontend of the Questionnaire Parlementaire system.

Backend Consultant

May 2019 - March 2020 (11 months)

Porto, Portugal

Jumia – E-commerce company.

Java, Spring Boot, PostgreSQL, Maven, IntelliJ IDEA, Angular, Git, GitHub, Jira, Confluence, Scrum.

- Collaborated in Agile teams to deliver scalable solutions for e-commerce platforms.
- Developed, maintained and tested backend services and enterprise applications using Java and Spring Boot.
- Contributed to code quality through frontend code reviews.

Accenture

Application Development Analyst

March 2017 - May 2019 (2 years 3 months)

São Paulo Area, Brazil

Client: Telefónica/Vivo – Telecommunication company.

Subprojects: Digital Transformation - New App Meu Vivo Fixo and Aura.

Activities:

- Development of microservices;
- Development of mobile application;
- Perform automated unit testing of microservices;
- Create the technical documentation;
- Generate Kibana visualization reports and dashboard;
- Installing and Configuring SonarQube with Docker, Creating Jenkins Pipelines (from git clone to distribute app);

Technologies:

- Development: React-Native, NodeJS, REST and VSCode;
- DevOps: Docker, Kubernetes, Jenkins, Nexus, SonarQube and ELK stack;
- Version Management: Git, GitLab;
- Tools: Jira, Swagger;
- Methodology: Scrum.

Subprojects: Meu Vivo, Meu Vivo Empresas and Meu Vivo Fixo.

Activities:

- Develop new features of the system;
- Repair system bugs;
- Create documents on tests of new features developed;
- Create mocks to test the development;

Technologies:

- Server: Oracle WebLogic;
- Portal framework: Oracle WebLogic Portal;
- Development: Java EE, Servlets, JSP, JSTL, Javascript, JQuery, CSS, SOAP and Eclipse;
- Content repository: Oracle UCM;
- Version Management: SVN;
- Tools: SharePoint, SoapUI.

BS Tecnologia e Serviços Ltda.

Java Systems Analyst

April 2016 - March 2017 (1 year)

São Paulo Area, Brazil

Development and maintenance service platform based on Java EE code for State Traffic Department of Bahia state, in Brazil.

Technologies:

- Operating System: Windows 8.
- Development platform: Java EE.
- Database: PostgreSQL.
- Frameworks and technologies: JPA, JSP, JSTL, Servlet, Maven, JavaScript, Ajax, CSS e HTML.
- IDE: Netbeans 7.3.
- Web Server: Tomcat 7.0.
- PM Software: Redmine.

## Accenture

### Junior Analyst

September 2015 - March 2016 (7 months)

São Paulo e Região, Brasil

Client: Porto Seguro.

- In charge of creating the system functional and technical documents aimed to deployment of the system.
- Responsible for performing deployment the system for Back-End, Front End, SOA and Batch in the Porto Seguro environment for testers to validate the points raised in the documentation.
- Batch applications developer that make up the system.

#### Technologies:

- Jenkins, Sonar
- Servers: IBM Websphere Application Server, Oracle Service Bus (OSB), Tomcat
- Java, Maven, RTC
- Tools: SharePoint and IBM Rational.
- Framework: Spring Batch

## BS Tecnologia e Serviços Ltda.

### Software Developer Junior

June 2014 - September 2015 (1 year 4 months)

Région de São Paulo, Brésil

#### Activities:

- Development of new features for the system and the CSO application
- Perform application maintenance;
- Repair system bugs;
- Create system reports;

#### Technologies:

- Development: Java EE, JPA (Eclipselink), JSP, Servlet, Maven, JavaScript, CSS, HTML and Netbeans 7.3; · Database: PostgreSQL;
- Web server: Tomcat 7.0;
- Report: Jasper, iReport.

## TECSO

Software Developer Intern  
July 2013 - July 2013 (1 month)  
Rosario, Santa Fé, Argentina

Development and maintenance of Java EE code for Rio Uruguay Seguros company.

Technologies:

- Operating System: Linux Ubuntu 12.04 LTS.
- Development platform: Java EE.
- Database: Informix.
- Frameworks: Hibernate, Spring, Maven, ZK.
- IDE: Eclipse Indigo.
- Web Server: Tomcat.
- Metodology: Scrum.
- PM Software: JIRA.

Fundação Educacional do Município de Assis  
Scientific Initiation Project

March 2012 - December 2012 (10 months)

Scientific Initiation Project called "Development of Scratch Programming Skills", from which a programming teaching module for children was developed and organized using Scratch as a programming language.

Forum: V Fórum Científico/FEMA – 2012, Assis/BRA.

Symposium: 20° Simpósio Internacional de Iniciação Científica/USP – 2012, São Paulo/BRA.

Article: Frontiers in Education Conference – 2013, Oklahoma City/USA.
